**Plan Notes**

- 1 month minimum contract term, a full 1 month charge/allowance will only apply if activated on the 1st of the month.
- Customers can move between plans after the minimum term has been reached in line with the next billing period. A new minimum term will apply once moved.
- \* A SCAP application form is required to be authorised by Inmarsat before a connection on the Premium plan can be completed, please allow 5 days to process.

- The Premium plan has SAC-C applied in line with Inmarsat's Fair Use Policy. The SAC-C service will employ sophisticated monitoring of the allowance and will vary the Quality of Service (QoS) experienced by an individual connection. Once the full 20GB allowance has been consumed the QoS (speed) will be reduced to 64kbps allowing for further usage but with no overage cost. The service will remain on this level until the start of the next billing period. For the Inmarsat Fair Use Policy please click this link and read carefully.

**Section 5: Monitor/Suspend** - Data monitoring is not used if service is subscribed to INTEGRA Control

- AST offer 5 monitoring alerts **per period** (period = billing period monthly) with an option to suspend. AST can not monitor Annual Period/Plans
- This service is offered to assist with usage control however, if because of system failure or any other reason outside of our control a report is not generated, all usage will be invoiced and due for payment as per clause 3 of our Terms and Conditions.
- We recommend that a suspension limit is set to stop further usage once the service reaches the set limit in any given period; **\$5000 has been set as a default please amend as appropriate.**
- Spend \$US alerts are triggered once the entire monthly bundle has been consumed. CDRs within bundle are zero rated.
- For a SCAP, these options can be applied at the SCAP level and individual SIM level.
- To restrict unwanted usage please refer to the checklist for controlling your traffic, available on request.
- Alternatively, please contact our Global Customer Support team for assistance on +44 (0) 1493 441485.

**In the case that automatic suspension of the service takes place, please contact AST to have the service unsuspended - It will NOT automatically unsuspend at the start of the next period.**

**Alert Levels - Up to five notification alerts can be set per period:**

## Section 9: AST INTEGRA Network & Firewall Rules

**The AST INTEGRA network provides several benefits to help manage your traffic (stated below). Customer preferences (rules) can be applied to block all or certain types of traffic, or to/from specific destinations. If your requirement is not covered by the options below, please contact our Global Customer Support team at [globalcustomersupport@ast-networks.com](mailto:globalcustomersupport@ast-networks.com) or call on +44 (0) 1493 441485.**

- INTEGRA See, INTEGRA See+, INTEGRA Control Lite & INTEGRA Control.
- Public dynamic and static IP addressing.
- Optimised internet routing using multiple Tier 1 providers.
- Advanced firewalling – Inbound/outbound/IP address/port rules and pre-built templates.
- Intrusion prevention – Inspection of all IP traffic for malware, vulnerabilities, etc.
- Web filtering, security, and optimisation – Category blocking, deep inspection of web traffic and optimisation.
- High bandwidth content blocking.
- Major update sites filtered/blocked.
- Usage reporting and alerting.
- Fully resilient infrastructure, monitored 24 x 7 x 365.
- X3 Points of presence – London, New York & Sydney in world-class data centres.
- Various inter-connect options via global telco's.

## Home POP

Selecting your Home POP dictates where your IP traffic breaks out of the Integra network and onto the internet. Your traffic will appear on the internet with a public IP address specific to the region. Internet services will be able to detect the region and may display different content based on this selection. The default option is London, selecting any other option could add additional latency (up to approx. 150ms).

## Firewall Rules

**Mobile to Fixed** – Outbound rules (E.g. Terminal to the internet) – Default is 'Open'

If no outbound firewall rules exist then the firewall will not restrict any outbound traffic, but standard web filtering policies (Blocking advertisements and software updates, etc) will still be in place.

Please select one option per protocol required for each IP destination

Example of IP address format 10.20.30.40 OR

Example of Network address 10.20.30.0/24

This will be the terminal IP address (default)
